

LAND OF THE NILE - IDEAS

Transportation - Wow! We could build a raft! Can we try it out in the river?

Egyptian Police – We need to come up with our own Code of Conduct. Can we do that next week?

Irrigation & Farming - It must have been really hard to water plants in Egypt! We should plant a seed, a bulb and a cutting!

Pharaohs – I read that the Pharaohs were sometimes cruel. I wonder are there people in the world today like the Pharaohs?

Weaving & Braiding - I'd love to know how to braid a rope! We could do a knot board!

Sun Dials – I wonder how we could tell the time without a watch? We could make a sundial.

Deserts – We could check out how places like Egypt keep their lands moist and grow crops.

Chariots - We could design our own cart that we could use on camp.

River Boats – They must have been really strong to row those boats. Can we go rowing?

Pyramids - There were loads of traps in the Pyramids. We could build a maze for the other Sixes to try to get through!

Papyrus - We could make our own paper by recycling newspapers.

Clothing – The Egyptians wore tunics to keep them cool. We could design a tunic for our Six.

Hieroglyphics - We could make a Welcome sign for our den using different languages and writing styles.
